

A nontrivial common sampled-best decision

Corrected pilot · episode:step 98900407:124 · H = 12 · 16 sampled worlds · all 6 root actions

Actions in every tied-best set across worlds and both repeat folds: a0, a1, a3, a4

All 32 repeats

Cell values are mean terminal scores: win = 1, draw = 0.5, loss = 0. * marks common sampled-best actions.
Selected from 5 low-H pilot positions, excluded from the confirmatory analysis; selection rules and candidate metrics are supplied.
These are finite-sample results under supplied full decklists and fixed continuation policies. They do not prove a forced line,
optimal play, full-history legality, or prevalence. The sampled worlds may differ in future draws as well as current hidden cards.
